Facts of ice

Our ice carvings are made to order, and are not moulded. We handcarve and use computer cnc machines to cut all our products.

We can create almost anything in ice from a small ice shot glass to our magnificent ice bars and we can cater for any event.

If you have seen something on the web or have an idea get in touch.

Almost every ice carving can be adapted to have either soft drinks or spirits running through them. This is more commonly known as a "vodka luge".

We supply all our carvings with drain trays, and LEDlights can be added if requested to create a more spectacular effect.

You can supply us with a picture or a sketch of your preferred ice carving for us to recreate, or choose from our most popular range within this brochure.

The most common size of our ice carvings is 100cm by 50cm x 25cm, known as 1 block carving. However, we can create multi-block designs to enhance your event.

Bespoke ice carving ideas are always welcome and we are happy to take up the challenge. We can submit you a quote and a design at your request.

We also can supply Ice team building & butter carvings, along with dry ice, cubed & crushed ice.

If you have any other questions then please feel free to call us to discuss.
